

ENERGY COMMITTEE
PURPOSE & OBJECTIVES

Chairman: Frederick P. Fendt, The Dow Chemical Company
Vice Chairman: Robin Mills Ridgway, Purdue University

PURPOSE :

The development, coordination, and dissemination of technically sound, equitable, and cost effective policy, laws, and regulations affecting energy products, sources, and equipment. This includes all fuels, electricity, renewables, and other sources, as well as all energy related equipment. Also included are energy usage, applicability, and cost.

OBJECTIVES :

1. Develop, coordinate, and promote policy positions on significant energy issues affecting CIBO members and all industrial energy users.
2. Formulate and set priorities on advocacy strategies for advancing CIBO energy objectives.
3. Provide a forum for the exchange of energy and related information within the membership and between the membership and government and other public bodies.
4. Assess and promote coalition building with other associations and organizations for meeting CIBO energy strategies.

SUBCOMMITTEES, TASK GROUPS, ETC.:
