TRI-MEweb Extra Enhancements for RY 2016

Category	Enhancement Description
Widgets	Phase 1 RMP threshold alert banner to inform users they may need to submit a RMP plan.
	Redesigned Upload Forms functionality which includes:
	- Upload unlimited number of chemicals in one XML.
	- Upload facility XML and choose whether to use address from FRS or XML.
Upload XML	- Compare uploaded contact info vs. contact info on file and select preferred contacts.
Preferences	New preference option to allow users to set default landing page.
MyTRI	Quick actions dropdown to allow users to jump to select reporting actions of the application.
MyTRI	Graphical snapshot to see summary of form statuses for current reporting year.
MyTRI	User profile gives the ability to edit telephone number / email within application.
MyTRI	Release trends chart from last three reporting years.
MyTRI	Notification sidebar displays link to unsigned TRIFID signature agreements.
MyTRI	Notification to authenticate unauthenticated facilities by user nominated to the facility account.
MyTRI	Countdown notification to TRI reporting deadline.
MyTRI	Notification to inform users of availability of new eReceipts.
Miscellaneous	Use of responsive design template for better performance across browsers and screen sizes.
Miscellaneous	Added login prompt notifying users if their browser does not support basic web features such as Flex Box.
Help	Implemented content-specific GuideME links throughout the application.
Help	Add new "Tutorials" dropdown that displays page-specific tutorials.
Help	Added functionality for users to submit suggestions via email to the TRI DPC email inbox.
Form Preparation	Add new "Tutorials" dropdown that displays page-specific tutorials.
Form Preparation	Added on-page validation and possible error for POTW names containing the word landfill.
Form Preparation	New validation prompt when users select range code to inform them total quantity is preferred.
Form Preparation	New functionality that sets user's total quantity equal to numeric basis if user changes numeric basis from midpoint.
Form Preparation	Added tooltips explaining numeric basis and basis of estimate.
Form Preparation	Added Section 5 and Section 8 guided mode.
Form Preparation	Redesigned Section 5.3 so users can edit their water body discharge location.
Form Preparation	Redesigned Section 6.1 and 6.2 so previously used POTWs and off-sites are displayed in table instead of dropdown.
Form Preparation	Redesigned data structure for Section 7A so users can edit waste treatment profile without affecting other forms in progress.
Form Preparation	Added tooltips to Section 5.1 - 5.5 and 8.1 - 8.7 to explain section titles.
Form Preparation	Added ability in Section 8.1 - 8.7 to copy current RY column to following and second-following year columns.
